Software Developer

EDUCATION

UNIVERSITI KEBANGSAAN MALAYSIA

Bachelor of Computer Science with Honours   Oct 2021 - Aug 2024

Major in Software Technology

Cumulative GPA: 3.69 ; Dean's List : Semester 1 and 2

Relevant Coursework: Object-Oriented Programming, Statistics, Advanced Databases, Operating System and Network Programming, Discrete Mathematics, Web Development Framework.

KOLEJ PROFESIONAL MARA BERANANG

Diploma in Computer Science   June 2018 - Sept 2020

Cumulative GPA: 3.38

Relevant Coursework: Object-Oriented Programming, Calculus, Databases, Procedural Programming, Software Testing.

WORK EXPERIENCE

TNB LABS SDN BHD

Software Developer (Contract)   Oct 2025 – Feb 2026

- Developed an SGP documentation management system for TNBS Labs, implementing a modernized CRUD workflow using React, Laravel (Inertia.js), and MySQL.
- Integrated AI capabilities to intelligently analyze and classify uploaded documentation, improving accuracy and operational efficiency.

RANIA RESOURCES SDN BHD

Web Developer Intern   Sept 2023 – Jan 2024

- Developed a new submodule for the system, utilizing Livewire and Laravel for both frontend and backend development.
- Modernizing the existing web-based system for the government sector, enhancing user experience and creating a dynamic and interactive interface.

PROJECTS

JOB APPLICATION WEB APP   Oct 2025

- Developed a complete Job Listing Management System (CRUD) using Laravel Framework and PostgreSQL.
- Implemented User Authentication and Role-Based Authorization (Job Seeker & Employer).
- Utilized TailwindCSS v4 and Vite for responsive, modern UI design.

DOCUMENT AI EXTRACTOR   Oct 2025

- Engineered a web-based document analysis system capable of extracting key information from PDF, DOCX, and TXT files using DeepSeek models.
- Built an intuitive, responsive interface with drag-and-drop uploads and implemented multiple AI-driven extraction modes for general, business, personal, and legal documents.
- Integrated secure file handling, validation controls, and export functionality to deliver accurate, user-friendly document processing.

CONTENT MANAGEMENT SYSTEM   Aug 2025

- Developed a blog management system using Laravel framework, implementing a robust CRUD functionality.
- Utilized Filament PHP to manage the admin dashboard, ensuring efficient code organization and maintainability through Laravel's MVC architecture.
- Designed and implemented a modern, responsive user interface using Tailwind CSS and delivering a clean, intuitive, and optimized user experience across all devices.

AIRCRAFT TOOLS MANAGEMENT SYSTEM   Aug 2023
- Designed and implemented a web-based tool management system using PHP.
- Developed and optimized the database structure using mysql for efficient data storage and retrieval and deployed the system using cPanel, ensuring accessibility and smooth operation.

ADDITIONAL

Technical Skills: Laravel, Java, Python, C Language, Networking, Web Framework, MySQL, PostgreSQL, React, InertiaJS, Tailwind CSS, Vue.
Software and Operating System : Figma, Canva, Git, Visual Studio, Linux, Windows, DeepSeek API, Word, Excel, GitLab.
Language: Malay, English
